

# white / dumpy tree frog care sheet

## habitat

10-20 gallon tank with secure lid. Provide large pieces of driftwood, artificial non-toxic plants, bark and branches with enough room to climb. Fine, particulate soil or ground coconut fiber (Advised not to use mulch/wood chips because they might get stuck in the frog's throat when eating). Make sure to use soil that retains moisture. Provide fresh clean chlorine-free water in a large shallow bowl daily.

## lighting

Provide a basking lamp. Tree frogs do not require lighting.

## temperature

Temperature should range from 68 at night, 75° to 80°F during the day.

## diet

Live gut-loaded crickets and worms. They can also eat pinkies or fuzzies. Sprinkle insects with calcium daily and with a mineral supplement once or twice a week.

## shopping list

- bedding
- terrarium with screen lid
- basking rock or log
- calcium & mineral supplements
- misting bottle
- climbing branches
- non-toxic plants
- live crickets
- thermometer
- humidity gauge
- shallow water bowl
- book about frogs

## fun facts
